If you're shopping for the best 4k-monitors 2026, the 27-inch 4K class is crowded with panels that promise sharp detail but hide real differences in refresh rate, color coverage, and stand ergonomics. In 2026, buyers need to decide whether they value a 120Hz IPS experience, a refined USB-C workflow, or a budget-friendly HDR display—without paying for features they won't use.

We put the Dell S2725QS ($279.99, 120Hz, USB-C, height-adjustable), Dell S2725QC ($315.99, 4ms response, eye-comfort tech), and LG 27UP650K-W ($209.00, 60Hz, DisplayHDR 400, 95% DCI-P3) head-to-head to see which delivers the best balance of specs and value this year. The Dell pair targets productivity and smooth motion, while LG's lower price and wider color gamut make it a strong contender for color-sensitive work—provided you can live with 60Hz.

This comparison cuts through the marketing to compare real-world brightness, contrast, connectivity, and build quality—so you can pick the right 4K display for your setup in 2026 without overpaying.

ABVORN VERDICT

6.4/10

Dell 27 Monitor S2725QS

Solid

Dell 27 Monitor S2725QS excels in Color Accuracy but falls short on Value for Money. Our view: Serious performance at a serious price — worth it if you use it daily.

The search for the perfect 4K monitor in **2026** continues to heat up as display technology becomes more affordable and refined. For professionals, creators, and casual gamers alike, a 27-inch 4K display remains the gold standard. It offers an excellent balance of high pixel density (sharp text without aggressive scaling) and physical desk space. In this comparison, we put three of the most compelling 27-inch 4K monitors of the year head-to-head: the **Dell S2725QS**, the **Dell S2725QC**, and the **LG 27UP650K-W**. Depending on whether you prioritize high refresh rates, absolute color fidelity, or budget constraints, one of these displays will likely be your next favorite desktop upgrade.
