For: Dell 27 Monitor S2725QS

This product aligns well with your preferences.

Better alternatives based on your preferences:

Dell 27 Monitor S2725QC	$315.99	**Regret Risk: 5%**
LG 27UP650K-W 27-inch Ultrafine 4K UHD (3840 x 2160) IPS Computer Monitor	$209.00	**Regret Risk: 5%**
Dell 32 Monitor S3225QS	$341.14	**Regret Risk: 5%**

Rated from Abvorn's default preference profile (5/10 weight on each factor). Personalise yours at abvorn.com.

In 2026, 4K monitors have moved from luxury upgrades to standard expectations for anyone who values sharp text, accurate color, and smooth motion. Whether you are editing high-resolution video, competing in fast-paced games, or simply want more screen real estate without scaling issues, a 3840 x 2160 panel delivers four times the pixel density of Full HD. This comparison focuses on five standout **4k-monitors** available right now: three 27-inch models and two 32-inch alternatives, spanning IPS and VA panels, refresh rates from 60Hz to 120Hz, and prices from just over $200 to roughly $340. Every price and spec cited below is current as of 2026.

What to Look For in a 4K Monitor

Before diving into individual reviews, it helps to understand the variables that actually change your daily experience in 2026:

- **Panel type:** IPS generally offers wider viewing angles and more accurate color; VA delivers deeper blacks and higher contrast ratios, which is noticeable in dark-room viewing.
- **Refresh rate:** 120Hz is now common on mid-range 4K panels and makes scrolling, cursor movement, and gaming noticeably smoother than 60Hz.
- **Brightness and HDR:** Look for at least 300 cd/m² for well-lit rooms. DisplayHDR 400 or HDR10 support improves highlight detail, though true local dimming is still rare at this price tier.
- **Color coverage:** 99% sRGB is the baseline for accurate web and office work; 95% DCI-P3 is a bonus for creative professionals.
- **Connectivity and ergonomics:** USB-C with video and power delivery is increasingly essential for laptop users. Height, tilt, pivot, and swivel adjustments prevent neck strain over long workdays.

Product Reviews: Dell S2725QS, Dell S2725QC, and LG 27UP650K-W

LG 27UP650K-W 27-inch Ultrafine 4K UHD (3840 x 2160) IPS Computer Monitor

Dell 27 Monitor S2725QS

Dell 27 Monitor S2725QS

The **Dell S2725QS** is a 27-inch 4K UHD IPS display running at 120Hz with AMD FreeSync Premium. At **$279.99** (down from $299.99), it sits in the sweet spot for users who want high refresh rate without paying premium USB-C prices. With 350 cd/m² brightness, a 1,500:1 contrast ratio, 99% sRGB coverage, and full height, swivel, and pivot adjustment, it covers both productivity and light gaming well.

Key Features

- 27-inch IPS, 3840 x 2160, 120Hz
- 5ms response time, FreeSync Premium
- 350 cd/m² brightness; 1,500:1 contrast
- 99% sRGB, anti-glare coating
- HDMI, DisplayPort, USB-C, ENERGY STAR certified
- Height adjustable, swivel, pivot stand

Pros

- 120Hz at 4K for under $280 in 2026
- Excellent ergonomic stand included
- USB-C port adds modern connectivity
- strong ongoing sales indicates strong buyer confidence

Cons

- IPS contrast (1,500:1) is decent but not as deep as VA alternatives
- 5ms response time is fine for casual gaming but not competitive esports
- No built-in speakers

Bottom Line: If you want a balanced 27-inch 4K monitor in 2026 with 120Hz smoothness, accurate color, and a fully adjustable stand, the Dell S2725QS at **$279.99** is one of the best values on the market.

Dell 27 Monitor S2725QC

Dell 27 Monitor S2725QC

The **Dell S2725QC** is the S2725QS’s more premium sibling, priced at **$315.99** (down from $349.99). It keeps the 27-inch 4K IPS 120Hz formula but sharpens the experience with a 4ms response time, 163 PPI pixel density, USB-C integration, Eye Comfort Technology, and an LED Edgelight System. With 732 ratings

averaging 4.4 stars, it appeals to professionals who need cleaner cable management and slightly faster motion handling.

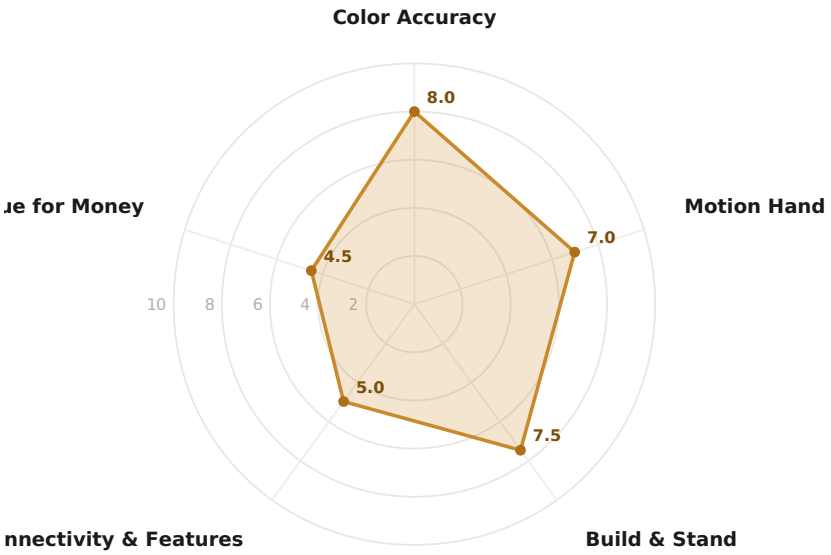

Key Features

- 27-inch IPS, 3840 x 2160, 120Hz, 163 PPI
- 4ms response time, FreeSync Premium
- 99% sRGB, anti-glare
- USB-C, HDMI, Display

Frequently Asked Questions

What is the best 4k monitors?

Dell 27 Monitor S2725QS is our current top pick for 4K Monitors. It earned an Abvorn Verdict score of 6.4/10 for color accuracy, motion handling, connectivity & features, and at $279.99 it offers the strongest balance of color accuracy, motion handling, connectivity & features for the money.

Is Dell 27 Monitor S2725QS worth it?

Based on our research, yes for most people. Dell 27 Monitor S2725QS scored 6.4/10 on our rubric, which weighs color accuracy, motion handling, connectivity & features in proportion to what real buyers care about. Dell 27 Monitor S2725QS excels in Color Accuracy but falls short on Value for Money. Our view: Serious performance at a serious price — worth it if you use it daily.

How much should I spend on 4k monitors?

You can get a genuinely good 4k monitors for around $300. Spending more buys premium materials and extra features, but our top pick delivers the best combination of performance and value at its current price.

What should I look for when buying 4k monitors?

We score every product on color accuracy, motion handling, connectivity & features. Start by deciding which of those matters most to you, then compare products on that axis first — the Abvorn Verdict breakdown below each review shows exactly how every model scores on each one.

How does Abvorn test products?

We research real listings and verified customer feedback, then score each product against a category-specific rubric with weighted criteria. Scores are out of 10 and the full breakdown is shown on every review, so you can see exactly why one product beat another.
