Performance on Carpets, Hardwood, Tile & Pet-Hair Areas

The Roomba 115X models deliver up to 2,500 Pa of suction on carpet – enough to lift embedded pet hair and debris. On hardwood and tile the same suction prevents scattering, while the vibrating mop pad adds a light-scrub action that removes stuck-on grime without over-wetting the floor.

Shark’s AI Ultra line advertises a maximum suction of 2,700 Pa and uses a self-cleaning brush roll that many owners report reduces hair wrap on pet-heavy rugs. However, Shark models lack an integrated mopping function, so they rely solely on vacuuming for hard floors.

Smart Home Integration & App Experience

All four units connect to 2.4 GHz Wi-Fi and can be controlled via their respective apps (iRobot Home, SharkClean). You can schedule cleanings, adjust suction/mopping strength, and receive maintenance alerts. Both ecosystems work with Alexa and Google Assistant for voice control.
