Introduction – why choosing the right robot vacuum matters in 2026

Smart homes are more connected than ever; a robot vacuum syncs with voice assistants and thermostats. A poor choice means pet hair, allergens, or endless bin-emptying chores.

What features should I compare when buying a robot vacuum in 2026?

- **Suction power (Pa)** – higher numbers lift deep-set dirt from carpets.
- **Auto-empty dock** – self-emptying to a sealed bin saves trips to the trash.
- **Mopping ability** – tank size, sponge material, anti-spill tech.
- **Battery life** – runtime vs. recharge time.
- **Navigation** – LIDAR, mapping, AI learning.
- **Smart-home integration** – voice control, scheduling, app UI.
- **Price & value** – MSRP vs. street price, long-term cost.

Problem. You want a vacuum that cleans, mops, and empties itself without a trip to the bin, but you worry about the cost.

Agitate. Many budget models require manual emptying, need pricey add-ons, or deliver weak suction that misses pet hair.

Solution. The Roomba 115X Combo with AutoEmpty Dock promises both vacuuming and mopping plus a self-emptying base for $199.99 (checked Oct 06 2026; original MSRP $469.99). It delivers 120 Pa suction, a 400 ml water tank, and LIDAR navigation that maps rooms in under 30 minutes.

Proof

- Self-emptying dock: after each cycle the robot deposits dust into a sealed bin with a simple button-off.
- Dual action: vacuum and mop in one pass, reducing the need for separate devices.
- Real-world tests show 90 % pet-hair pickup on medium-pile carpet after one run.
