Both brands rely on proprietary systems to build maps and avoid obstacles, but the underlying technology leads to different real-world behavior. Roomba 115X (vSLAM): Uses a ceiling-mounted camera and inertial sensors to create a map of rooms. It works well in moderate light and can re-localize if moved, but performance can drop in very dark rooms or when reflective surfaces confuse the camera. Shark AI Ultra (AI Laser Navigation): Emits a laser sweep to measure distances, generating a precise grid-based map. Laser navigation is less affected by lighting conditions and tends to produce cleaner, more repeatable maps, especially in larger homes. Suction specifications are not disclosed in the retail listings, but owner feedback frequently highlights the Shark’s higher airflow on carpets and rugs, while Roomba owners praise the consistent edge-cleaning brush design that reduces missed debris along walls. For pet-hair households, the Shark’s self-cleaning brushroll is marketed to prevent hair wrap,
