How We Tested

We didn’t run lab tests; instead we collected each manufacturer’s published specs, scanned thousands of verified owner reviews, and extracted recurring performance themes.

Suction was compared using the advertised air-watts or Pascal ratings when available.

Navigation quality was judged by lidar versus camera-based systems and real-world success in avoiding cords and pet waste.

Mopping effectiveness looked at water-tank size, vibration frequency, and user-reported streak-free results.

Auto-empty convenience considered bin capacity and docking noise.

App experience covered map saving, scheduling, and smart-home integrations.

Battery life came from advertised run-time per charge.

Finally, value weighed price against the feature set, using the October 5 2026 retail price.
