Why does comparing the iRobot Roomba 115X Combo models and the Shark AI Ultra matter in 2026? In 2026, robot vacuums have moved beyond basic suction to combine mopping, AI navigation, and self-emptying docks. Two popular lines – iRobot’s Roomba 115X Combo (with and without the AutoEmpty

Dock) and Shark’s AI Ultra series – represent different approaches to those advances. Understanding their trade-offs helps you match features to your floor type, pet presence, budget, and desire for hands-free maintenance. What key criteria should I consider when choosing a robot vacuum in 2026? Suction power – determines how well debris, pet hair, and fine dust are lifted from carpets and hard floors. Navigation & mapping – laser or AI-driven systems avoid repeated passes and enable room-specific cleaning. Mopping capability – adds a wet-clean pass for sticky spills and everyday grime on sealed hard floors. Auto-empty dock – transfers collected debris to a larger bin, reducing manual emptying frequency. Battery life & runtime – influences how large an area can be cleaned per charge. App controls & smart home integration – scheduling, zone cleaning, and voice assistant compatibility. Price – upfront cost versus long-term convenience. What does the iRobot Roomba 115X Combo Robot Vacuum & Mop with AutoEmpty Dock offer? The Roomba 115X Combo with AutoEmpty Dock (ASIN B0H34W2MS8) combines vacuuming and mopping in a single pass, then deposits dirt into a sealed base that holds up to 30 days of debris. Priced at $199.99 (checked October 06, 2026) versus an original $469.99, it carries a 4.4-star rating from 5,217 reviews and notes “6K+ bought in past month”. The dock eliminates the need to empty the bin after every run, a boon for busy households or pet owners. iRobot’s Imprint Smart Mapping lets you label rooms, set no-go zones, and schedule cleaning via the iRobot Home app, which works with Alexa and Google Assistant. check price on Amazon How does the iRobot Roomba 115X Combo Robot
