Why 4K Still Matters in 2026

4K resolution is now the baseline for most living-room TVs, delivering four-times the detail of Full HD. LED back-lighting dominates the market, while Mini-LED and QD-OLED panels raise contrast and colour fidelity to new heights. Most units now ship with built-in voice assistants and HDMI 2.1 ports for next-gen gaming.

What to Look For

- **Screen size vs. viewing distance:** Aim for a size that fills ~30-40% of your field of view.
- **HDR support:** HDR10 is a must; Dolby Vision is a bonus.
- **Smart platform:** Choose a system you already use (Fire TV, webOS, Google TV).
- **Future-proof ports:** HDMI 2.1 for high-frame-rate gaming and eARC for top-tier audio.
