2026 TV Market Snapshot – What's Shaping Your Choice?

In 2026, 4K is the baseline; 8K remains a niche premium. Mini-LED panels dominate high-end units, delivering deeper blacks and higher peak brightness. Smart platforms have converged around Amazon Fire TV, offering voice control and a massive app library. Prices have softened: solid 4K LEDs under $200, while a 55-inch Mini-LED sits around $900.

Key Specs to Prioritise

- **Resolution:** 4K (3840×2160) is standard – look for HDR10 or Dolby Vision.
- **Panel Type:** LED vs. Mini-LED – Mini-LED offers better local dimming.
- **Refresh Rate:** 60 Hz suffices for movies; 120 Hz shines for gamers.
- **Smart Platform:** Compatibility with your preferred voice assistant and apps.
