## 2026 TV Trends You Need to Know

4K UHD is now the baseline for most living-room sets, while Mini-LED backlighting is gaining traction for deeper blacks and brighter highlights. Most new models ship with HDMI 2.1, enabling 4K@120 Hz gaming and variable refresh rate (VRR). Integrated voice assistants and robust app ecosystems – think Amazon Fire TV and LG's webOS – make smart features truly useful.

## How to Pick the Right TV Size for Your Room

Use the simple rule of thumb: multiply the diagonal size by 1.5 – 2.5 to find the ideal viewing distance (in inches). That translates to:

- 50-inch: 6.3 – 10.4 ft
- 55-inch: 6.9 – 11.5 ft
- 75-inch: 9.4 – 15.6 ft

Choose the size that fits both your space and your viewing habits.
