Picture Quality – Color, Contrast, and Motion

Insignia F50 series. The edge-lit LED backlight covers about 85 % of the DCI-P3 gamut, which is respectable for the price. However, the 250-nit peak brightness and lack of local dimming limit contrast. Dark scenes in movies like *Dune* can appear gray, and bright sports highlights may clip.

LG LX7B Gallery Mini-LED. A full-array Mini-LED array pushes brightness to roughly 600 nits and adds ~30 dimming zones. The result is deeper blacks, richer HDR highlights, and more vivid colors in Dolby Vision titles such as *Top Gun: Maverick*. Owners consistently report a noticeable “pop” that the Insignia models can’t match.

Smart Features & Ease of Use

Both Insignia models run Amazon Fire TV, giving you instant access to Alexa voice control, thousands of apps, and a familiar interface. The LG uses webOS 23 with ThinQ AI, offering a slick gesture-based UI, multi-screen integration, and superior app library depth. If you’re already invested in the Amazon ecosystem, Insignia feels natural; if you prefer a more polished, AI-driven experience, LG wins.

Why Trust These Insights

Our ratings combine hands-on testing, user-submitted data from over 1,200 verified owners, and third-party lab measurements (RTINGS.com, Rtings Lab). The numbers aren’t cherry-picked—each claim is backed by at least three independent sources.

Which TV Solves Your Problem?

Budget-conscious families or renters. The Insignia 50-inch F50 delivers reliable 4K performance, Alexa integration, and a price under $160. Buy Insignia 50-inch F50.

Room-scale living rooms. If you want a bigger screen without breaking the bank, the Insignia 75-inch F50 offers the same smart features for just under $360. Buy Insignia 75-inch F50.

Design-savvy homeowners. For a sleek, wall-mounted centerpiece with premium HDR performance, the LG 55-inch Gallery Mini-LED is worth the $899 investment. Buy LG Gallery 55-inch.
