They deliver bright images (up to 350 cd/m²) but lack the deep blacks of a local-dimming mini-LED subsystem. HDR10+ content displays up to 850 cd/m², which is adequate on a living-room wall. The LG 55" Gallery uses LG’s Mini-LED RGB LED micro-LED approach. With 468 local dimming zones, it achieves peak brightness of 1,200 cd/m² and sub-0.1 % black, yielding richer HDR contrast and vivid colors. The thin 4-mm bezel framing the screen adds a gallery-style aesthetic, especially attractive in elegant living rooms. The 32" F20 model offers Full-HD resolution at a fraction of the price, but its 3-zone dimming and 300 cd/m² brightness limit its HDR performance. It’s best suited for bedroom or small spaces where 4K is not necessary. Smart TV Experie
