Key Decision Factors – What to weigh before you buy

Screen size: Match the TV to your viewing distance. A bedroom or dorm works well with 32- to 43-inch screens; a living room shines at 55 inches or larger.

Resolution: 4K UHD is now the baseline for most models, delivering four times the detail of Full HD.

Smart platform: Fire OS (Alexa-centric) vs. webOS (clean layout, broad app support). Choose the ecosystem you already use.

Picture technology: Basic LED vs. Mini LED – the latter adds tighter local dimming for deeper contrast and brighter highlights.

Price & use-case: Movies, gaming, or casual viewing each justify a different spend tier.
