2026 TV Landscape: Trends & Tech to Watch

Here’s what’s shaping the scene:

- All premium models sport 4K UHD; HDR-10+, HDR-10, or Dolby Vision are usual.
- Voice-assistant integration (Alexa, Google Assistant, Apple TV Remote v2) is now standard.
- HDMI-EARC 2.1 delivers Dolby-Atmos or similar audio to your soundbar.
- Mini-LED backlights enable finer contrast control and richer color, especially in LG’s newer gallery-style models.

What Buyers Should Ask Themselves

1. What’s the size of my living space and the typical viewing distance?
2. Will the TV be the focal point or a secondary screen?
3. Do I already own a soundbar, or will I need one?
4. Which smart OS will I use most—Amazon Fire TV, LG webOS, Android TV?
5. What’s my budget, and can I plan for a future sound system?
6. Is an energy-efficient or battery-saver mode a priority?

50" Insignia F50 vs 75" Insignia F50: Why Size Matters

Both share the same 60 Hz panel, HDR-10, and Alexa integration on Fire TV OS. The 75" model is 25 % larger—great for an 9-ft viewing distance—while the 50" fits 7-8 ft comfortably and costs $159.99.
