A straightforward, side-by-side comparison of real specs, owner feedback, and price points helps you zero in on the features that truly affect cleaning performance, battery life, and long-term value.

What to Look For When Buying a Robot Vacuum

Focus on these key criteria:

- **Suction Power**—measured in Pa or air watts.
- **Filtration**—HEPA vs. standard.
- **Navigation**—random, laser-SLAM, or AI-vision.
- **Mopping Capability**.
- **Battery Runtime**.
- **Smart Home Integration**.
- **Price**.

Match these to your floor type, pet presence, and home size to avoid paying for features you won’t use.

Roomba 115X Combo vs. Vacuum-Only

Dropping the mop and AutoEmpty dock saves roughly $60. Suction stays at 2,000 Pa, navigation remains iAdapt 3.0 with vSLAM, and the unit runs quieter (≈62 dB vs. 65 dB with mop). For homes that don’t need mopping, the vacuum-only version delivers the same cleaning power at lower cost and with fewer moving parts.

Is the Shark AI Ultra Worth It?

Shark’s AI Ultra uses laser-SLAM and AI-object avoidance to map up to 2,500 sq ft per charge, boasting 2,700 Pa suction. It’s a top choice for larger spaces that demand smarter navigation, but comes at a higher price point. Decide if advanced AI navigation justifies the extra spend for your floor plan.
