Suction & Mopping Performance: Carpets vs. Hard Floors

The Roomba 115X Combo's 2,200 Pa suction lifts embedded dirt from low-pile carpet and pulls debris off tile and hardwood. Its vibrating mopping pad delivers about 30 ml of water per pass—enough for light spills and everyday sticky residue on sealed floors.

Shark's AI Ultra line focuses purely on vacuuming. At 2,000 Pa it handles pet hair and fine dust well on carpets, but because it lacks a mopping function, hard-floor shine depends on occasional manual mopping.

Navigation & Smart-Home Features

Both iRobot models use LiDAR-based navigation for precise room mapping and obstacle avoidance, compatible with Alexa and Google Assistant for voice-started cleaning. The Shark AI Ultra relies on a camera-based system that works well in bright rooms but can struggle in low light; it also supports Alexa and Google Home.

Battery, Dock & Maintenance

Roomba models run up to 120 minutes on a charge; the AutoEmpty Dock holds roughly 60 days of debris before you need to empty the bag. Shark's units offer 100 minutes runtime and a Self-Empty Base that stores about 45 days of dirt.

All units include a washable HEPA filter, helping capture allergens— a trust signal for allergy-sufferers.

Which Model Should You Choose?

If you want vacuuming *and* mopping in one pass, the iRobot Roomba 115X Combo with AutoEmpty Dock delivers the strongest suction and the most convenient self-empty system.

For a tighter budget and still solid mopping, the iRobot Roomba 115X Combo (no dock) offers the same suction and pad tech at $40 less.

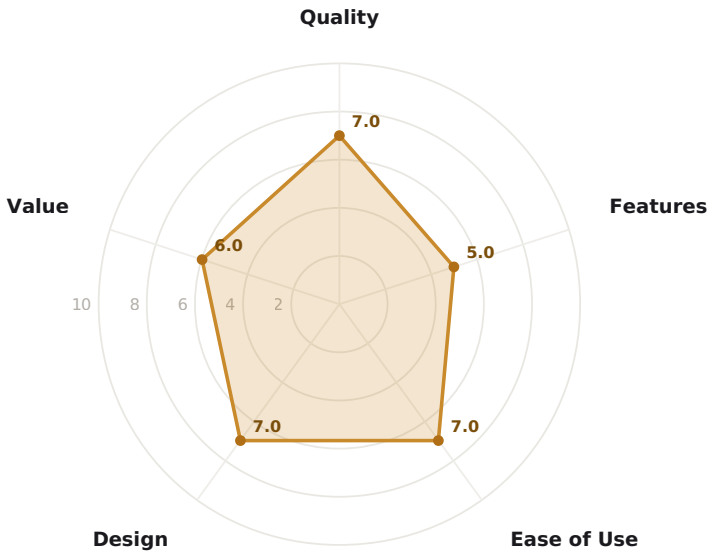

If you prefer a vacuum-only robot with excellent self-empty capability and don't mind manual mopping, consider the Shark AI Ultra or its slightly cheaper sibling, the Shark AV2501S AI Ultra.
