1. The Problem: Why Your Current Chair Is Hurting You

Most office chairs lack proper lumbar support, encourage slouching, and force you into static positions that strain muscles.

If you’re experiencing lower-back pain, neck stiffness, or fatigue after a few hours, your chair is likely the culprit.

2. Building Trust: What Makes a Chair Ergonomic?

True ergonomic chairs share three key features: adjustable lumbar support, seat-depth adjustment, and armrests that move in multiple directions.

We’ve consulted physical therapists and reviewed dozens of models to confirm that these adjustments actually reduce pressure points.
