Why should you buy a 4K Smart TV in 2026?

With streaming services dominating entertainment, a 4K Smart TV gives you instant access to Netflix, Disney+, Prime Video, and more in ultra-high definition—no extra boxes required. The price gap between 1080p and 4K has narrowed, and today’s models include built-in voice assistants, multiple HDMI 2.0+ ports, and HDR support that makes movies and games pop.

What to Look for in a Smart TV?

- **Screen size:** Match the diagonal to your viewing distance (≈1.5× the screen size for comfortable viewing).
- **Resolution:** 4K UHD (3840×2160) is now the baseline for new sets.
- **HDR:** Look for HDR10, HLG, or Dolby Vision (availability varies by model) for brighter highlights and deeper contrast.
- **Processing chip:** A stronger CPU/GPU improves upscaling and smart-platform responsiveness.
- **Sound:** Built-in speakers vary; consider a soundbar if you want cinematic audio.
- **Connectivity:** At least three HDMI ports (HDMI 2.0 or higher for most budget models), USB, Ethernet, and Wi-Fi 5 or better.
- **Operating system:** Fire TV, Roku, webOS, or Google TV each offer different app ecosystems and voice controls.
