Understanding Your Viewing Needs

Before you click “add to cart,” answer three simple questions: How big is the room? How far will you sit from the screen? What kind of content do you watch most?

- A 50-inch TV fits a 10-12-ft² living room with a 6-7-ft viewing distance.
- A 75-inch model shines in larger spaces (15-20-ft²) where you sit 9-10-ft away.
- In 2026, 4K is the baseline; HDR adds the punch you want for movies and games.
