Why TV Shopping Matters in 2026

8K panels, AI-upscaling, and built-in voice assistants have turned TVs into all-in-one entertainment hubs. The right choice means flawless picture, lag-free gaming, and seamless streaming without overpaying.

How to Choose the Right Size & Features

Screen size

Measure your viewing distance and multiply by 0.5-0.6 for 4K content. **Example:** 6-8 ft → 50" screen; 10-12 ft → 75" screen.

Resolution & HDR

4K is the baseline. Look for HDR10, HDR10+ or Dolby Vision for richer colors. Mini-LED and OLED give deeper blacks; LED offers the best value.

Smart platform

Amazon Fire TV, Roku, Android TV, and LG webOS each excel in app support and voice control. Choose the one that matches your favorite services.

Connectivity

For 4K@120 Hz gaming you need HDMI 2.1. Aim for at least three HDMI ports plus USB and Ethernet for consoles or soundbars.
