Picture quality, brightness and HDR: LED vs. Mini LED

Both Insignia models use edge-lit LED panels with a typical peak brightness of about 300 nits and support HDR10 and HLG. They deliver clear, colorful images that are perfect for everyday viewing in moderately lit rooms.

The LG LX7B upgrades to a Mini-LED backlight, pushing peak brightness to roughly 600 nits. This results in deeper blacks, more pronounced HDR highlights and a contrast ratio that owners frequently describe as “noticeably richer” for dark-scene movies.

Which TV should you choose? (Action)

If you need a solid, affordable set for a bedroom or small living area, the Insignia 50" F50 gives you 4K and Fire OS for under $160.

For larger spaces where screen real-estate matters, the Insignia 75" F50 delivers the same smart experience at a still-reasonable $360.

When you want premium contrast, brighter HDR and a sleek white-frame design that doubles as wall art, the LG 55" LX7B Gallery Mini LED is worth the $900 investment.
