Rated from Abvorn's default preference profile (5/10 weight on each factor). Personalise yours at abvorn.com.

INSIGNIA 50″ vs 75″ F50 Series: Size, Price & Viewing Experience Compared

The two INSIGNIA F50 models share the same 4K UHD panel, Fire TV OS, and HDR10 support, but their screen sizes lead to very different use cases.

The 50-inch version measures roughly 44.1" wide × 25.4" tall (without stand) and fits comfortably on a bedroom dresser, kitchen counter, or small guest-room wall. At a price of $159.99 (checked Oct 3 2026) it offers a cost of about **$3.20 per diagonal inch**.

The 75-inch model is about 65.4" wide × 37.7" tall, needing a viewing distance of roughly 9–12 feet to avoid eye strain, making it ideal for a main living-room or home-theater setup. Its price of $359.99 (checked Oct 3 2026) works out to roughly **$4.80 per inch**, still a strong value for a large screen.

Both TVs run Amazon’s Fire TV OS, giving access to over 10,000 apps, Alexa voice remote, and automatic monthly updates. Owner feedback highlights the easy setup and reliable streaming performance on both sizes, though the larger panel benefits more from the higher brightness when watching HDR content in a bright room.

Quick Comparison Table

Model	Screen Size	Price (Oct 3 2026)	Resolution / HDR	OS	Best For
INSIGNIA 50″ F50	50″ class	$159.99	4K UHD, HDR10	Fire TV	Bedroom, kitchen, small rooms
INSIGNIA 75″ F50	75″ class	$359.99	4K UHD, HDR10	Fire TV	Main living room, movie nights
LG 55″ LX7B	55″ class	$899.99	4K UHD, Mini LED, HDR10+/ Dolby Vision	webOS	Premium picture in midsize space

Fire TV OS vs LG webOS: Smart Features, App Ecosystems & User Experience in 2026

Amazon’s Fire TV OS, present on both INSIGNIA models, emphasizes deep Alexa integration. Press the microphone button and ask for weather, control smart-home devices, or launch apps with voice commands. The OS supports major streaming services (Netflix, Disney+, Max, Paramount+, Peacock, etc.) and offers a

universal search that aggregates results across apps. Fire TV also includes a gaming mode that reduces input lag for casual titles.

LG’s webOS on the LX7B provides a clean, card-based interface with quick access to LG Channels, Apple AirPlay 2, and Google Assistant compatibility. It delivers smooth navigation and supports the same major streaming apps, plus LG’s own content ecosystem. Users often praise webOS for its responsiveness and low-power standby.

If voice-controlled smart-home control is a priority, Fire TV has the edge; if you prefer a polished, customizable UI with excellent motion handling, webOS wins.

Which TV Matches Your Room, Budget & Priorities?

- **Small spaces (bedroom, dorm, kitchen)** – Choose the INSIGNIA 50″ F50 for the lowest cost per inch and easy placement.
- **Main living-room or home theater** – The INSIGNIA 75″ F50 gives a cinematic size without breaking the bank; sit 9-12 ft back for optimal comfort.
- **Premium picture in a midsize room** – The LG 55″ LX7B delivers Mini-LED brightness, HDR10+/Dolby Vision, and a refined webOS experience — ideal if you value image fidelity over sheer size.
