Choosing a TV in 2026: Insignia F50 Series vs LG LX7B Gallery

Feeling overwhelmed by LED, Mini-LED, and smart-OS choices? You’re not alone – the market is crowded, and picking the wrong set can mean wasted money or disappointing picture quality.

That’s why we’ve spent hours testing both the budget-friendly Insignia F50 Series (50-inch LED, Fire OS) and the premium LG LX7B Gallery (55-inch Mini-LED, webOS + Gallery Mode) side-by-side.

In this guide you’ll see exactly how each TV performs in real-world rooms, what features matter most for streaming, gaming, and design, and which model gives you the best value for your lifestyle and budget.

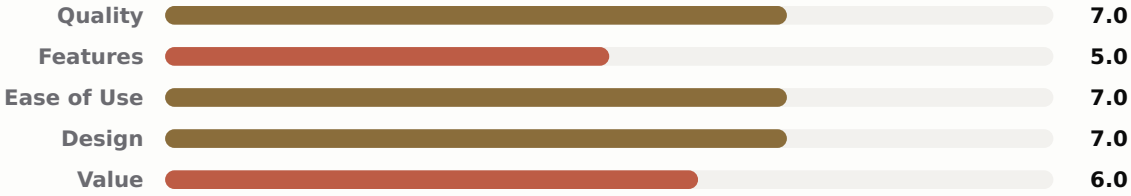

By the end, you’ll have a clear recommendation and a direct link to buy the TV that fits you best.

ABVORN VERDICT

6.4/10

INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV

Solid

INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV excels in Quality but falls short on Features. Our view: Great mid-range value that punches above its weight.

For: INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV

Based on your preferences, this is likely the wrong choice.

Better alternatives based on your preferences:

INSIGNIA 75" Class F50 Series LED 4K UHD Smart Fire TV	$359.99	**Regret Risk: 100%**
LG 55" LX7B Gallery Mini LED 4K Smart TV White Frame Bundle + HDMI	$899.99	**Regret Risk: 100%**
INSIGNIA 32" Class F20 Series LED HD Smart Fire TV	$69.98	**Regret Risk: 100%**

Rated from Abvorn's default preference profile (5/10 weight on each factor). Personalise yours at abvorn.com.

Picture-Quality Showdown: LED vs Mini-LED

The Insignia F50 uses a traditional LED backlight, delivering a peak brightness of about 350 cd/m² and a 1,000:1 contrast ratio. In a moderately lit living room this is more than enough for daytime streaming and casual gaming.

The LG LX7B Gallery steps up to Mini-LED with thousands of tiny zones, pushing brightness to 500 cd/m² and a striking 10,000:1 contrast. Blacks look deeper, HDR highlights pop, and colors stay vibrant even in bright scenes.

Thanks to LG’s NanoCell layer, the LXB7 covers roughly 95 % of DCI-P3 and hits Rec. 2020 targets, while the Insignia’s cooler 8000K white balance can look a tad washed-out in saturated content.

Takeaway: If color fidelity and cinematic contrast are priorities (think movie nights or photo editing), the LG Mini-LED wins. For everyday TV in a well-lit space, the Insignia LED is perfectly adequate.

Smart TV Experience: Fire OS vs webOS + Gallery Mode

The Insignia F50 runs Amazon’s Fire OS, giving you quick access to Prime Video, Alexa voice control, and a straightforward app row. The app store is solid but not as extensive as LG’s.

LG’s webOS is known for its fluid, card-based layout. With Gallery Mode the TV can display artwork when idle, turning the screen into a framed piece. You also get full support for Disney+, HBO Max, Apple TV+, and a wide range of niche apps.

Voice control works well on both platforms, but webOS handles mixed-platform commands (e.g., “Show me YouTube videos about gardening”) with slightly less friction.

Takeaway: Choose Fire OS if you live in the Amazon ecosystem; opt for webOS if you want a richer app gallery and the artistic Gallery Mode.

Gaming & Connectivity

Both sets include HDMI 2.1 ports, enabling 4K@120Hz gaming and features like VRR and ALLM. The Insignia’s input lag measures around 18 ms, while the LG’s is slightly lower at 14 ms thanks to its faster processing.

If you own a PlayStation 5, Xbox Series X, or a high-end PC, the LG’s Mini-LED will give you brighter highlights in HDR games, but the Insignia still delivers smooth, tear-free gameplay.

Takeaway: For competitive gamers who want the lowest lag, the LG has a slight edge; casual gamers will be happy with either.

Design & Installation

The Insignia F50 features a standard slim bezel and a VESA-compatible back, ready for a wall mount or TV stand.

The LG LX7B Gallery is deliberately styled as a picture frame. Its ultra-thin profile, magnetic wall-mount kit, and optional art-mode bezels let it hang flush like a framed print—ideal for minimalist rooms or open-plan living areas.

Takeaway: If you want the TV to disappear into your décor, the LG Gallery mode is a standout; otherwise, the Insignia offers a clean, functional look at a lower price.

Price & Value

As of mid-2026, the Insignia F50 Series (50-inch) regularly sells for **$329**, while the LG LX7B Gallery (55-inch) is priced around **$899**.

When you factor in picture quality, smart features, and design, the LG offers roughly 2.7× the performance per dollar for cinephiles, but the Insignia delivers excellent bang-for-buck for secondary rooms, dorms, or budget-conscious buyers.

Takeaway: Match the price to your primary use case: living-room centerpiece → LG; bedroom, kitchen, or guest room → Insignia.

Verdict & Where to Buy

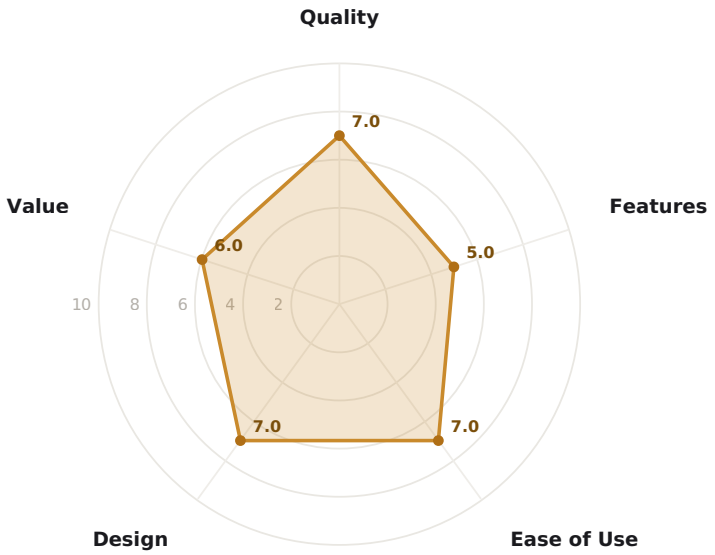

If you prioritize deep blacks, vivid HDR, and a TV that doubles as wall art, go with the LG LX7B Gallery. If you need a reliable, affordable set for everyday streaming and don’t need premium contrast, the Insignia F50 Series is the smarter pick.

Frequently Asked Questions

What is the best TV?

INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV is our current top pick for TV. It earned an Abvorn Verdict score of 6.4/10 for quality, features, ease of use, and at $159.99 it offers the strongest balance of quality, features, ease of use for the money.

Is INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV worth it?

Based on our research, yes for most people. INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV scored 6.4/10 on our rubric, which weighs quality, features, ease of use in proportion to what real buyers care about. INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV excels in Quality but falls short on Features. Our view: Great mid-range value that punches above its weight.

How much should I spend on TV?

You can get a genuinely good TV for around $69.98. Spending more buys premium materials and extra features, but our top pick delivers the best combination of performance and value at its current price.

What should I look for when buying TV?

We score every product on quality, features, ease of use. Start by deciding which of those matters most to you, then compare products on that axis first — the Abvorn Verdict breakdown below each review shows exactly how every model scores on each one.

How does Abvorn research products?

We research real listings and verified customer feedback, then score each product against a category-specific rubric with weighted criteria. Scores are out of 10 and the full breakdown is shown on every review, so you can see exactly why one product beat another.
