Key Decision Factors for a 2026 TV Purchase

When shopping for a TV today, focus on four core factors: display technology (LED vs Mini-LED), resolution (4K UHD is standard), smart platform integration (Fire TV, webOS, etc.), and physical size relative to viewing distance. In 2026, HDR performance and low input lag matter for both movies and gaming, while built-in voice assistants reduce remote clutter. Price-to-performance remains the decisive metric for most buyers.
