Key Decision Factors at a Glance

- **Screen size:** Measure viewing distance; a 50" suits 6-8 ft, 55" works 7-9 ft, and 75" needs 9-12 ft for immersive viewing.
- **Picture quality:** Look for 4K resolution, HDR10+/Dolby Vision support, and panel type (LED vs Mini-LED). Mini-LED offers deeper blacks and higher peak brightness.
- **Smart features:** Fire TV OS provides Alexa voice control and extensive app library; LG’s webOS (in the Gallery bundle) offers thin-bezel design and Apple AirPlay 2.
- **Budget:** Determine how much you’re willing to spend now vs. potential future upgrades.
