Which TV Is Right for You?

If you have a small to medium room and want the most affordable entry point, the **Insignia 50″** delivers solid 4K performance and Alexa convenience without breaking the bank.

For a spacious living room or home theater where screen impact matters, the **Insignia 75″** gives you a cinematic canvas at a still-reasonable price per inch.

When peak brightness, HDR nuance, and a premium design are priorities—especially for bright rooms or avid gamers—the **LG 55″ LX7B**'s Mini LED panel and Dolby Vision IQ provide a noticeable step up in picture quality.

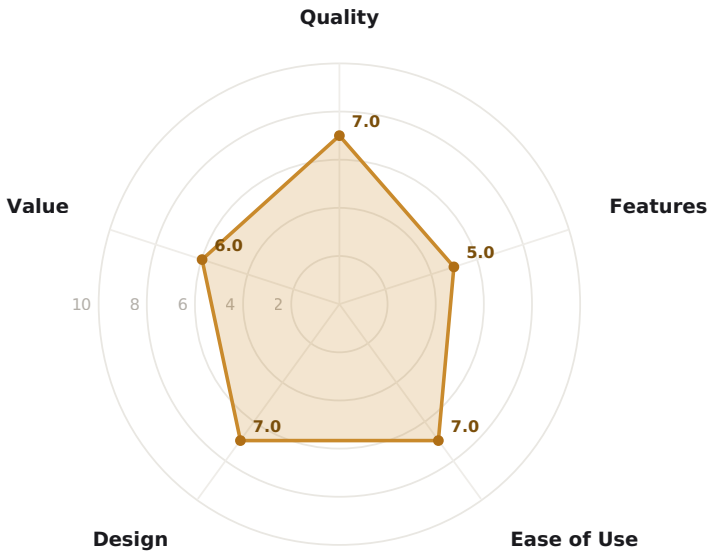

Final Recommendation

We recommend matching your viewing distance to screen size: aim for roughly 1.5-2.5 times the diagonal inches. Then weigh the extra $150-$200 for the LG's Mini LED boost against the larger screen real-estate of the 75″ Insignia. Either way, all three sets come with a one-year warranty and reliable smart platforms, so you can shop with confidence.
