Best Fitness Trackers 2026: Google Fitbit Air vs. Fitness Tracker with 24/7 Heart Rate

Independent research and reviews · https://abvorn.com

We earn a commission if you buy through our links, at no extra cost to you. Our opinions are our own.

Want the best fitness trackers 2026? You’re probably overwhelmed by wearables promising better steps, heart-rate insights, sleep tracking, and more.

The problem? A great fitness tracker in 2026 shouldn’t feel like a puzzle. Do you go for a polished option like the Google Fitbit Air, or a budget-friendly fitness tracker with 24/7 heart rate that delivers core health tracking without the premium price?

That’s why we’re comparing the Google Fitbit Air vs. the Fitness Tracker with 24/7 Heart Rate in this best fitness trackers 2026 guide, so you can find the right fitness tracker for your goals without guessing.

ABVORN VERDICT

6.8/10

Google Fitbit Air - Screenless Activity Tracker

Solid

Google Fitbit Air - Screenless Activity Tracker excels in Accuracy but falls short on Health Features. Our view: Great mid-range value that punches above its weight.

Fitness Tracker with 24/7 Heart Rate $26.09	**Regret Risk: 25%**

Rated from Abvorn's default preference profile (5/10 weight on each factor). Personalise yours at abvorn.com.

Finding the **best fitness trackers 2026** means balancing what you actually need against what marketing claims. This year, the market splits sharply between screenless minimalism, budget feature-packed bands, and mid-range smartwatches with GPS. We've compared five current models — ranging from $26 to $169 — using spec sheets, verified owner feedback, and pricing data to help you decide without guesswork.

What to Look For in a Fitness Tracker

Before diving into specific models, consider these core factors:

- **Display vs. screenless:** Do you want glanceable stats on your wrist, or are you fine checking everything in an app?
- **Health sensors:** 24/7 heart rate is standard; SpO2 (blood oxygen), stress tracking, and blood pressure estimates vary by model.
- **Water resistance:** 5 ATM (50m) supports swimming; IP68 handles rain and showers but not laps.
- **Battery life:** Screenless trackers last weeks; color displays often need charging every 5–11 days.
- **Ecosystem:** Fitbit ties into Google's health platform; Garmin excels for athletes; budget bands use generic apps.
- **Price vs. longevity:** Cheaper bands may lack firmware updates or app support after 1–2 years.

Google Fitbit Air - Screenless Activity Tracker

Google Fitbit Air - Screenless Activity Tracker

The **Google Fitbit Air** ($99.99) takes a different approach: no screen at all. It's a lightweight, clip-on or wrist-worn pod that syncs everything to the Fitbit app. With a 4.3-star average from 2,504 reviews and 10K+ units bought in the past month, it's gaining traction for minimalists.

Key Features

- Screenless design — all data viewed in the Fitbit app
- Tracks steps, distance, calories, active zone minutes, sleep stages

- 24/7 heart rate monitoring
- Up to 8-day battery life (per Fitbit claims)
- Water resistant to 50m (5 ATM)
- Obsidian color; includes wrist band and clip accessory
- Integrates with Google Fitbit ecosystem (Premium trial often included)

Pros & Cons

- **Pros:** Discreet, lightweight, long battery, strong app ecosystem, swim-proof
- **Cons:** No on-device display, no GPS (relies on phone), no SpO2 or stress tracking, higher price for no screen

Bottom line: Best for users who want Fitbit’s sleep and recovery insights without a glowing screen on their wrist. If you already check your phone for stats, the Air saves bulk and battery anxiety.

Fitness Tracker with 24/7 Heart Rate

Fitness Tracker with 24/7 Heart Rate

Fitness Tracker with 24/7 Heart Rate

Two budget bands share this generic name but differ significantly in price and specs. Both are sold under generic brands (not Fitbit, Garmin, etc.) and rely on third-party apps like "VeryFit" or "GloryFit."

Model A: $26.09 (was $28.99) — 4.9 stars, 80 reviews

Key features from listing: 24/7 heart rate, blood oxygen, blood pressure estimate, sleep monitoring, 5 ATM waterproof, step/calorie counter, pedometer, marketed for women and men.

- **Pros:** Extremely low cost, 5 ATM swim rating, SpO2 and BP estimates (rare at this price), high initial rating
- **Cons:** Only 80 reviews — limited long-term reliability data; generic app experience; blood pressure accuracy unverified; no GPS; unknown firmware support

Bottom line: A low-risk trial if you want basic metrics and swim tracking under $30. Treat health estimates as trends, not medical data.

Model B: $49.99 — 4.7 stars, 84 reviews

Key features from listing: 24/7 heart rate, blood oxygen, sleep monitor, 123 sports modes, calorie tracking, IP68 waterproof (not swim-rated), step counter, pedometer.

- **Pros:** More sports modes, slightly more reviews, SpO2 included
- **Cons:** IP68 only — not for swimming; no blood pressure estimate; same generic app concerns; nearly double the price of Model A for fewer water-resistant features

Bottom line: Only worth the extra $24 if you need 123 sport modes and don’t swim. Otherwise, Model A offers better water resistance for less.

Google Fitbit Inspire 3 - Midnight Zen/Black

The **Fitbit Inspire 3** ($85, down from $99.95) remains a staple. With 28,308 reviews averaging 4.2 stars and 10K+ bought recently, it’s the most battle-tested option here. It adds a color OLED touchscreen to the core Fitbit experience.

Key Features

- Color OLED display with always-on option
- 24/7 heart rate, SpO2, skin temperature variation, stress management score
- Sleep staging with Sleep Score and Smart Wake
- Up to 10-day battery (typical use)
- 5 ATM water resistant
- Includes small & large bands
- Phone GPS tethering (no built-in GPS)
- Fitbit Premium trial (usually 6 months)

Pros & Cons

- **Pros:** Proven reliability, excellent sleep insights, strong community/app, swim-proof, both band sizes included
- **Cons:** No onboard GPS, screen scratches easily (consider protector), Premium features require subscription after trial

Bottom line: The best all-rounder under $100 for most people. You get a screen, trusted algorithms, and ecosystem support — ideal if you want a “set and forget” daily tracker.

Garmin vívoactive 5

The **Garmin vívoactive 5** ($168.95, down from $299.99) sits in a different tier: a true GPS smartwatch with 42mm AMOLED display. With 12,717 reviews at 4.3 stars and 4K+ recent purchases, it targets serious recreational athletes.

Key Features

- Built-in GPS (no phone needed for runs/rides)
- AMOLED touchscreen, 42mm case
- 24/7 heart rate, HRV status, SpO2, Body Battery, stress tracking
- Sleep coach with nap detection
- Up to 11 days battery (smartwatch mode); 21 hours GPS mode
- 5 ATM water resistant
- Music storage (500 songs), Garmin Pay, safety features

- 80+ sports apps, animated workouts

Pros & Cons

- **Pros:** Independent GPS, excellent training metrics, music offline, long battery with GPS on, deep Garmin Connect analytics
- **Cons:** Price jump over Fitbit bands; smaller screen than some rivals; no cellular/LTE; proprietary charger

Bottom line: The pick if you run, bike, or hike without your phone and want actionable recovery data. Overkill for step counting alone.

How to Choose the Best Fitness Tracker

Match your primary use case:

- **Invisible tracking + sleep focus:** Google Fitbit Air ($99.99)
- **Budget basics + swim proof:** Fitness Tracker Model A ($26.09)
- **Budget + multisport modes (no swim):** Fitness Tracker Model B ($49.99)
- **Daily driver with screen, trusted app:** Fitbit Inspire 3 ($85)
- **Training with GPS, no phone:** Garmin vívoactive 5 ($168.95)

Consider hidden costs: Fitbit Premium ($9.99/mo) unlocks deeper insights; Garmin has no subscription. Generic bands may lose app support — check recent app store updates before buying.

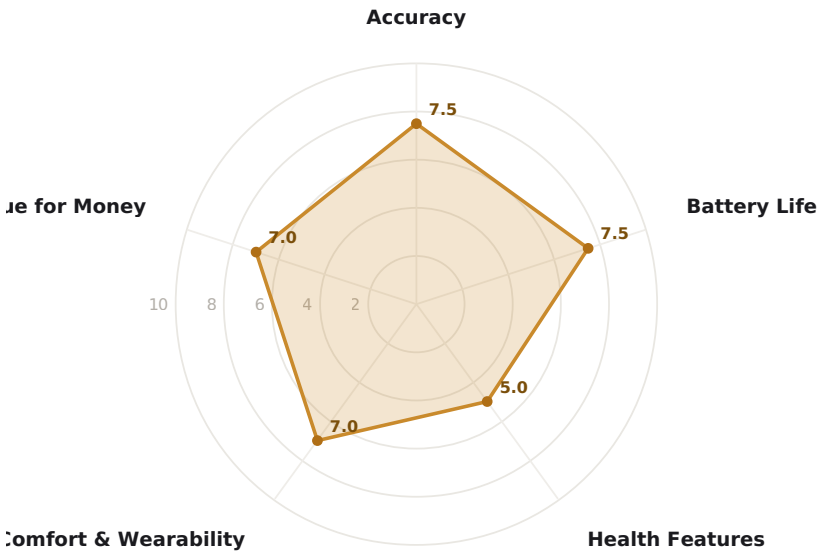

Buying Guide

- **Where to buy:** All listed models are available on Amazon with standard return windows. Prices fluctuate — the Inspire 3 and vívoactive 5 show notable discounts off MSRP as of 2026.
- **Band compatibility:** Fitbit Air and Inspire 3 use proprietary bands; Garmin uses 20mm quick-release. Generic bands often

Frequently Asked Questions

What is the best fitness tracker?

Google Fitbit Air - Screenless Activity Tracker is our current top pick for Fitness Trackers. It earned an Abvorn Verdict score of 6.8/10 for accuracy, battery life, health features, and at $99.99 it offers the strongest balance of accuracy, battery life, health features for the money.

Is Google Fitbit Air - Screenless Activity Tracker worth it?

Based on our research, yes for most people. Google Fitbit Air - Screenless Activity Tracker scored 6.8/10 on our rubric, which weighs accuracy, battery life, health features in proportion to what real buyers care about. Google Fitbit Air - Screenless Activity Tracker excels in Accuracy but falls short on Health Features. Our view: Great mid-range value that punches above its weight.

How much should I spend on fitness trackers?

You can get a genuinely good fitness tracker for around $26.09. Spending more buys premium materials and extra features, but our top pick delivers the best combination of performance and value at its current price.

What should I look for when buying fitness trackers?

We score every product on accuracy, battery life, health features. Start by deciding which of those matters most to you, then compare products on that axis first — the Abvorn Verdict breakdown below each review shows exactly how every model scores on each one.

How does Abvorn research products?

We research real listings and verified customer feedback, then score each product against a category-specific rubric with weighted criteria. Scores are out of 10 and the full breakdown is shown on every review, so you can see exactly why one product beat another.
