Frequently Asked Questions

What is the best laptop?

Dell 15.6 Laptop is our current top pick for Laptops. It earned an Abvorn Verdict score of 6.7/10 for performance, battery life, build & portability, and at $399.99 it offers the strongest balance of performance, battery life, build & portability for the money.

Is Dell 15.6 Laptop worth it?

Based on our research, yes for most people. Dell 15.6 Laptop scored 6.7/10 on our rubric, which weighs performance, battery life, build & portability in proportion to what real buyers care about. Dell 15.6 Laptop excels in Battery Life but falls short on Value for Money. Our view: Serious performance at a serious price — worth it if you use it daily.

How much should I spend on laptops?

You can get a genuinely good laptop for around $319.96. Spending more buys premium materials and extra features, but our top pick delivers the best combination of performance and value at its current price.

What should I look for when buying laptops?

We score every product on performance, battery life, build & portability. Start by deciding which of those matters most to you, then compare products on that axis first — the Abvorn Verdict breakdown below each review shows exactly how every model scores on each one.

How does Abvorn research products?

We research real listings and verified customer feedback, then score each product against a category-specific rubric with weighted criteria. Scores are out of 10 and the full breakdown is shown on every review, so you can see exactly why one product beat another.
