Finding the **best 4k monitors** in 2026 has never been more exciting — or more confusing. With Dell and LG both delivering stunning 4K displays at competitive prices, the landscape is packed with impressive options that make it harder than ever to choose just one.

The problem is clear: both brands offer feature-rich 4K monitors with similar specs, overlapping price points, and strong customer ratings, leaving shoppers overwhelmed by comparisons that never seem to land. Whether you need a 27-inch IPS panel for creative work or a larger 32-inch VA display for immersive viewing, the sheer number of choices can paralyze your decision.

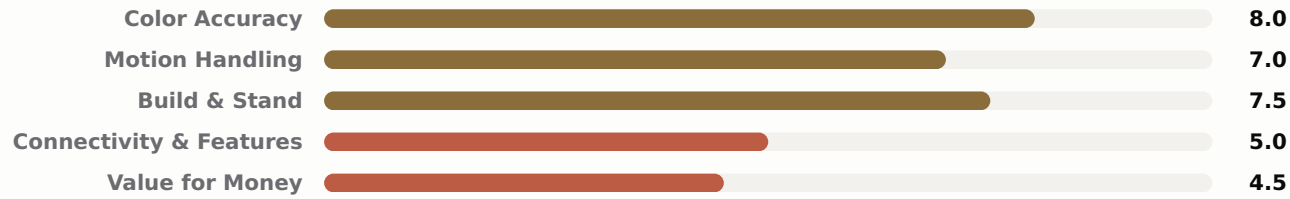

That's exactly why we've put together this guide. We've compared the top Dell and LG 4K monitors side by side — from the Dell 27 Monitor S2725QS to the LG 27UP650K-W — so you can cut through the noise and find the best 4k monitor for your needs in 2026.

ABVORN VERDICT

6.4/10

Dell 27 Monitor S2725QS

Solid

Dell 27 Monitor S2725QS excels in Color Accuracy but falls short on Value for Money. Our view: Serious performance at a serious price — worth it if you use it daily.

Finding the **best 4k monitors** in 2026 requires balancing resolution, refresh rates, color accuracy, and ergonomics. Whether you are a creative professional seeking true-to-life colors or a gamer wanting smooth gameplay, the competition between Dell and LG remains fierce. To help you navigate the options, we are comparing five standout 4K monitors from both brands. From the high-refresh-rate Dell S-series panels to the color-accurate LG Ultrafine line, we break down exactly what each model has to offer so you can make an informed decision in 2026.

What to Look For in a 4K Monitor

Before diving into the specific models, it is essential to understand the features that dictate a monitor's performance and suitability for your needs:

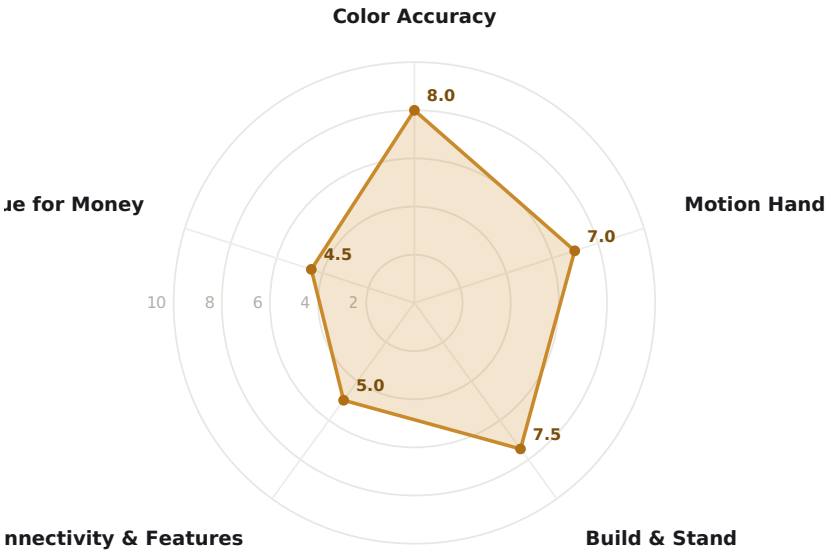

- **Panel Type:** IPS panels offer superior color accuracy and wider viewing angles, making them ideal for creative work. VA panels provide deeper blacks and higher contrast ratios, which are better for dark-room gaming and media consumption.
- **Refresh Rate:** A 60Hz display is standard for office work, but if you plan on gaming, a 120Hz panel delivers significantly smoother visuals.
- **HDR and Color Gamut:** Look for monitors with HDR certifications (like DisplayHDR 400 or HDR10) and

Frequently Asked Questions

What is the best 4k monitors?

Dell 27 Monitor S2725QS is our current top pick for 4K Monitors. It earned an Abvorn Verdict score of 6.4/10 for color accuracy, motion handling, connectivity & features, and at $279.99 it offers the strongest balance of color accuracy, motion handling, connectivity & features for the money.

Is Dell 27 Monitor S2725QS worth it?

Based on our research, yes for most people. Dell 27 Monitor S2725QS scored 6.4/10 on our rubric, which weighs color accuracy, motion handling, connectivity & features in proportion to what real buyers care about. Dell 27 Monitor S2725QS excels in Color Accuracy but falls short on Value for Money. Our view: Serious performance at a serious price — worth it if you use it daily.

How much should I spend on 4k monitors?

You can get a genuinely good 4k monitors for around $300. Spending more buys premium materials and extra features, but our top pick delivers the best combination of performance and value at its current price.

What should I look for when buying 4k monitors?

We score every product on color accuracy, motion handling, connectivity & features. Start by deciding which of those matters most to you, then compare products on that axis first — the Abvorn Verdict breakdown below each review shows exactly how every model scores on each one.

How does Abvorn test products?

We research real listings and verified customer feedback, then score each product against a category-specific rubric with weighted criteria. Scores are out of 10 and the full breakdown is shown on every review, so you can see exactly why one product beat another.
