Why a robot vacuum belongs in your 2026 smart home

Modern households juggle work, kids and a growing ecosystem of smart devices that already control lighting, temperature and security. Adding a robot vacuum that runs on a schedule, dodges obstacles and even empties its own bin cuts the daily chore load by up to 30 % according to user surveys conducted in early 2026. The result is cleaner floors with virtually no effort, freeing you to focus on what matters.

Key features to look for in a 2026 robot vacuum

- **Navigation & mapping:** LiDAR or vSLAM creates room-by-room maps for efficient, repeat-free cleaning.
- **Battery life:** Aim for at least 90 minutes on hard floors; many models now offer 120 minutes with recharge-and-resume.
- **Mopping capability:** Integrated water tanks and vibrating mop plates lift sticky spills without a separate device.
- **Auto-empty dock:** Holds 30-60 days of debris, so you empty the dock only once a month.
- **Pet-hair performance:** Rubberized brush rolls and suction of 2000 Pa + prevent tangles and pick up embedded fur.
- **App & voice control:** Works with Alexa, Google Assistant and the vendor’s app for voice-started, stopped or scheduled cleaning.

Is the iRobot Roomba 115X Combo with AutoEmpty Dock the right choice for you?

Problem

You want a robot that both vacuums and mops, but you hate having to empty the bin after every run.

Agitate

Manually emptying a small bin after each cleaning session can add up to 10 minutes a week—defeating the purpose of a “set-and-forget” appliance.

Solution

The iRobot Roomba 115X Combo (ASIN B0H34W2MS8) pairs a 2-in-1 vacuum-mop system with an AutoEmpty Dock that holds up to 60 days of debris.

Proof

Checked on October 04, 2026, the unit sells for $199.99 (down from $469.99). It features iRobot’s PrecisionVision navigation, a 120-minute battery, and a 3-stage cleaning system that earns 4.6 ★ average from over 2,300 verified buyers.
