Why you need a robot-vacuum buying guide in 2026

If you’re still lugging a heavy upright every day, you’re wasting time and energy while dust keeps settling.

Today's robot vacuums do more than suck: they mop, empty themselves automatically and build AI maps of multiple floor plans.

With prices ranging from under $150 to nearly $600, picking the right model means balancing suction, navigation and maintenance convenience.

A clear comparison prevents overpaying for useless features or missing capabilities that matter for pet hair, allergies or large-area coverage.

What are the key differences between the iRobot Roomba 115X Combo Vacuum & Mop with AutoEmpty Dock, the Roomba 115X Combo (no dock) and the Shark AI Ultra?

iRobot Roomba 115X Combo Robot Vacuum & Mop

iRobot Roomba 115X Combo Robot Vacuum & Mop with AutoEmpty Dock

All three share the same vacuum-mop platform, but they diverge in docking, navigation and price.

The Roomba 115X Combo with AutoEmpty Dock (ASIN B0H34W2MS8) includes a base that empties the dustbin after each run, holds up to 30 days of debris and adds roughly $60 to the price.

The Roomba 115X Combo without dock (ASIN B0H34PBVQB) relies on a manual bin you empty after every cycle.

The Shark AI Ultra (ASIN B09T4YZGQR) uses Shark’s AI Laser Navigation, offers a self-cleaning brushroll but does not ship with an auto-empty dock in the base configuration.

How does suction power, brush design, and mopping effectiveness compare on carpets, hardwood and tile?

Each unit uses a 3-stage system: side brushes, a main brushroll and suction.

According to the manufacturers’ specs (checked October 5 2026), the Roomba 115X Combo models deliver **2000 Pa** of suction, while the Shark AI Ultra lists **2700 Pa**.

The Roomba’s dual-action brushroll agitates carpets and sweeps hard floors, whereas the Shark’s self-cleaning brushroll reduces hair wrap.

All three feature a vibrating mop pad that leaves hardwood and tile streak-free; the Roomba’s water tank holds 180 ml, the Shark’s 200 ml.

On low-pile carpet, the Roomba’s 2000 Pa lifts embedded pet hair adequately, while the Shark’s higher suction excels on thicker rugs.

For hardwood and tile, both brands provide comparable mopping scores, so your decision hinges on navigation preference and whether you value self-empty convenience.
