## Why a Robot Vacuum & Mop Combo Makes Sense in 2026

Today’s floors face daily dust, pet hair, spills, and a mix of carpet and hard surfaces. A robot that both vacuums and mops can tackle these chores without you lifting a finger, freeing up time for work, family, or relaxation.

## What to Look for When Buying a Robot Vacuum in 2026

- **Suction power** – measured in Pascals (Pa); higher values pick up finer debris and pet hair.
- **Navigation technology** – LiDAR (laser) or VSLAM (camera-based) determines how accurately the robot maps rooms and avoids obstacles.
- **Mopping capability** – look for a vibrating pad or adjustable water-flow system that can handle light stains on sealed hard floors.
- **Battery life and runtime** – longer runtimes mean fewer recharges for larger homes.
- **Auto-empty dock** – a base that stores weeks of debris reduces maintenance frequency.
- **Price and value** – compare the current price to the original MSRP and factor in long-term costs of consumables (filters, mop pads).
- **App and smart-home integration** – Wi-Fi, Alexa/Google Assistant compatibility, and scheduling features add convenience.
