What are the biggest TV trends in 2026?

4K UHD remains the baseline, while 8K stays a premium niche. Mini-LED and OLED dominate the high-end market, delivering superior contrast and deeper blacks. Smart platforms have converged—Amazon Fire TV, Google TV, and LG webOS now support voice assistants, dedicated gaming modes, and instant app access. Thanks to a 30% price drop since 2023, mid-range 4K sets are more affordable than ever, making larger screens accessible to most budgets.

How do I choose the right TV?

Follow this simple decision framework:

- **Screen size:** Measure your viewing distance; multiply the distance (in inches) by 1.5 to get the ideal screen size.
- **Resolution & HDR:** Look for true 4K with HDR10+ or Dolby Vision for richer colors and brighter highlights.
- **Smart ecosystem:** Pick Fire TV for seamless Amazon integration, webOS for LG's AI-driven features, or Google TV for deep Android app support.
- **Panel technology:** LED for budget-friendly brightness, Mini-LED for premium contrast, OLED for the ultimate black levels.
- **Design & connectivity:** Thin bezels, VESA-compatible wall-mounts, and at least one HDMI 2.1 port for next-gen gaming.
