What to Look for When Buying a TV in 2026

Problem: You want a crisp, immersive picture without blowing your budget.

Start with the basics:

- **Screen size:** Sit about 1.5 × the screen height away for optimal 4K clarity.
- **Resolution:** 4K UHD (3840×2160) is now the standard; 8K is still niche.
- **HDR support:** HDR10, HLG, and Dolby Vision give brighter highlights.
- **Smart platform:** Fire TV, Roku, webOS, or Google TV affect app availability and voice-assistant integration.
- **Connectivity:** At least three HDMI 2.1 ports for 4K/120 Hz gaming and an eARC port for soundbars.
- **Room lighting:** Bright rooms need high peak brightness and anti-glare; dark rooms benefit from deep blacks and contrast.
