Action: Use the table below as your decision-making checklist.

Key decision factors for buying a 4K Smart TV today

- **Screen size:** Measure your viewing distance; a 50-inch TV works well for 6-9 ft, while a 75-inch suits 9-12 ft.
- **Panel technology:** LED gives good brightness and price; Mini LED adds local dimming for deeper blacks and higher contrast.
- **Smart platform:** Fire TV provides extensive app support and Alexa voice control; webOS offers a clean UI and quick navigation.
- **Connectivity:** Look for at least three HDMI 2.1 ports for gaming consoles and soundbars, plus USB for media playback.
- **Price and value:** Compare cost per inch and note any bundled accessories (e.g., HDMI cable, wall-mount kit).

Proof: These criteria are consistently cited by experts at RTINGS.com and CNET as the top predictors of satisfaction.
