Price & Value Comparison

As of October 04 2026, the Insignia 50″ F50 Series LED 4K UHD Smart Fire TV is listed at $159.99 (down from $299.99), while the 75″ version sells for $359.99 (originally $399.99). The LG 55″ LX7B Gallery Mini LED 4K Smart TV White Frame Bundle + HDMI carries a price of $899.99 with no listed original price.

That works out to roughly $3.20 per diagonal inch for the 50″ Insignia, $4.80 per inch for the 75″ Insignia, and $16.36 per inch for the LG—clearly a cost-per-inch advantage for the Insignia models, especially the smaller set.

Picture Technology Showdown

The Insignia F50 series uses a standard edge-lit LED panel with 4K UHD resolution and HDR10 support. In bright rooms the image looks lively, but dark scenes can lose contrast and detail.

The LG LX7B employs a Mini LED backlight with numerous local-dimming zones, delivering deeper blacks, higher peak brightness, and noticeably better HDR performance—ideal for movies, gaming, and HDR content.

Owner feedback on the Insignia models notes satisfactory color accuracy for everyday streaming, while LG reviewers praise the vivid, cinema-like picture quality.

Which One Should You Buy?

If your priority is maximum screen size for the lowest price, the Insignia 75″ F50 Series gives you the most real-estate per dollar and retains the full Fire TV experience with Alexa voice control.

If you value picture fidelity—especially for HDR movies, sports, or gaming—and are willing to pay a premium for refined backlight technology, the LG 55″ LX7B Gallery is the stronger choice.
