How to Choose the Right TV Size for Your Room

Start by measuring the distance from your seating spot to where the TV will go. If you sit 8-10 feet away in a living room, a 50-inch screen gives you a comfortable 30-degree field of view — ideal for relaxed viewing without eye strain.

For tighter spaces like a bedroom or small den where the view is 6-7 feet, a 32- to 43-inch set works, but you can still go 50-inch if you crave a cinematic feel.

In open-plan areas with a sofa 12-14 feet back, a 75-inch display fills the visual field while keeping brightness comfortable.

If you have a dedicated media lounge with a viewing distance of 10-12 feet, the 55-inch model hits the sweet spot between immersion and practicality.

Tip: Grab a tape measure, note the distance, and use the chart above to pick the size that matches your room.

Smart TV Platform: Fire TV vs. webOS

The INSIGNIA F50 Series runs Amazon Fire TV, giving you instant access to over 20,000 apps, Alexa voice control, and tight integration with Echo devices. Its grid-based layout surfaces recommendations so you can launch Netflix, Prime Video, or Disney+ with one press.

The LG LX7B uses webOS 23, known for its smooth card-like launcher and the Magic Remote that lets you point, click, and scroll like a mouse. webOS shines at multitasking — pop up a secondary app while watching — and includes LG's ThinQ AI for smart-home control.

Both platforms receive regular updates in 2026, but Fire TV tends to add new streaming services faster, while webOS often leads in UI responsiveness and customization.

LED vs. Mini LED Backlighting

Standard LED TVs, like the INSIGNIA models, use a uniform backlight behind the LCD panel. This delivers decent brightness but can cause light bleed in dark scenes, lowering perceived contrast.

The LG LX7B features Mini LED backlighting — thousands of tiny diodes controlled in tight zones. The result is higher peak brightness (up to 1,000 nits), deeper blacks, and richer HDR detail.

If you watch a lot of movies in a dim room or enjoy HDR gaming, the Mini LED advantage is noticeable.

Frequently Asked Questions

What is the best TV?

INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV is our current top pick for TV. It earned an Abvorn Verdict score of 6.4/10 for quality, features, ease of use, and at $159.99 it offers the strongest balance of quality, features, ease of use for the money.

Is INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV worth it?

Based on our research, yes for most people. INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV scored 6.4/10 on our rubric, which weighs quality, features, ease of use in proportion to what real buyers care about. INSIGNIA 50" Class F50 Series LED 4K UHD Smart Fire TV excels in Quality but falls short on Features. Our view: Great mid-range value that punches above its weight.

How much should I spend on TV?

You can get a genuinely good TV for around $69.98. Spending more buys premium materials and extra features, but our top pick delivers the best combination of performance and value at its current price.

What should I look for when buying TV?

We score every product on quality, features, ease of use. Start by deciding which of those matters most to you, then compare products on that axis first — the Abvorn Verdict breakdown below each review shows exactly how every model scores on each one.

How does Abvorn research products?

We research real listings and verified customer feedback, then score each product against a category-specific rubric with weighted criteria. Scores are out of 10 and the full breakdown is shown on every review, so you can see exactly why one product beat another.
